

FGL Environmental

Fruit Growers Laboratory, Inc.

This very experienced team will provide a "total package" program to dairies operators and their advisors to assist with compliance with the Regional Board's Order No. R5-2007-0035 for Dairy Operations

Fruit Growers Laboratory, Inc./ FGL Environmental (FGL) is a State certified (ELAP) and agricultural laboratory. FGL provides sampling and analysis services for drinking water, wastewater, groundwater and run off water compliance monitoring. FGL is also provides analysis of agricultural soils, manures, tissue and irrigation waters. The company maintains three (3) laboratories in California, Santa Paula (Ventura County), Stockton and Chico and a field office in Visalia. FGL was founded in 1925.

Our professional staff will work diligently with our dairy clients and their advisors to ensure compliance with the mandated time lines outlined in the newly emplaced regulations. The adoption of Waste Discharge Requirement (WDR) General Order will impose significant regulations upon California dairy operations. Cost effective technical project management and efficient completion of RWQCB mandated sampling and reporting requirements will reduce the financial impact to individual dairy owners.

Regional Board's Order No. R5-2007-0035 for Dairy Operations

Our experience in this area is extensive:

1. We have worked with the Regional Water Quality Control Board on the Agricultural Waiver program for irrigated lands and similar programs.
2. All analyses required by the Regional Board's dairies monitoring initiative are conducted in-house at FGL. These include the analysis of well water, irrigation water, run off, storm water, discharge water, manures and plant tissue.
3. All dairy compliance deadlines can be entered into the laboratory's computer systems. Paperwork (preprinted chains of custody, preprinted labels), sampling kits and supplies are generated and prepared in a timely manner for each sampling event.
4. FGL can also provide the electronic reporting format required by Regional Board.
